PROFESSIONAL SUMMARY

Software developer with a B.Tech in Computer Science and an M.S. in Management Information Systems, shipping production backend systems in **Node.js/TypeScript** and **Python**. Built a real-time WebSocket streaming service, a Postgres-backed persistence API, and a FastAPI backend serving 500+ daily requests at sub-200ms - and caught a critical middleware defect in code review before it reached production. Comfortable owning a service end to end: design, deploy, load-test, and monitor.

CORE COMPETENCIES

Node.js / TypeScript

Python / FastAPI

REST APIs & WebSockets

PostgreSQL / Supabase

AWS & Docker

LangChain / RAG

Code Review

Agile / Scrum

WORK EXPERIENCE

Oshi Mar 2026 - May 2026

Backend Developer & QA Intern · Remote

- Shipped a real-time **WebSocket**-based text-to-speech streaming backend (**Node.js/TypeScript**) to Render with CORS whitelisting, rate limiting, and structured logging; load-tested across **20 concurrent sessions with zero connection leaks**.
- Designed and deployed a user-state persistence service on **Supabase/Postgres** with 3 REST endpoints, time-based state decay, and login restore powering the app's real-time reactions.
- Performed a full backend code review surfacing **16 bugs**, including a critical Express middleware-ordering defect that would have broken **every Stripe webhook signature verification** in production.

EchoformAI Oct 2025 - Jan 2026

Co-Founder & ML Engineer · Remote

- Architected and deployed **LLM-powered inference pipelines** (Python, LangChain, AWS EC2/S3/Lambda) serving **50+ beta users** in the RF engineering community.
- Led product development from ideation to **MVP in 8 weeks**, managing a cross-functional team of 3 engineers and coordinating sprint planning and the technical roadmap.

Sentient Notes Jan 2025 - Jul 2025

Associate Founder & Backend Developer · Remote

- Designed and implemented the backend API in **Python (FastAPI)**, handling **500+ daily journal entries** at **sub-200ms** response times.
- Engineered an **on-device NLP** processing pipeline for privacy-first data handling, with cloud fallback to AWS foundation models for complex sentiment analysis.

PROJECTS

Team Task Tracker - Full-Stack Web App Full-Stack

Built a Kanban-style task management app with a **REST API**, user authentication, and drag-and-drop status tracking. Deployed to Render with environment-based configuration and input validation.

React, Node.js / Express, PostgreSQL, Render

Generative AI Business Intelligence Assistant GenAI / RAG

Designed a **RAG** system with LangChain and the OpenAI API letting non-technical users query SQL databases in natural language, cutting report turnaround from **3 days to under 5 minutes**. Automated KPI summarization, modeled to remove **~15 hours** of manual reporting per week. Deployed in Docker on GCP for **20+ concurrent users**.

Python, LangChain, OpenAI API, SQL, Docker, GCP

EDUCATION

M.S., Management Information Systems - Northern Arizona University Jan 2023 - May 2026 · GPA 3.7/4.0

Flagstaff, AZ · Coursework: Project Management, Business Analytics, Database Management, Data Visualization, Systems Analysis & Design (SDLC), Statistical Analysis

B.Tech, Computer Science - Narasaraopet Engineering College Jun 2018 - Jun 2022 · GPA 8.63/10

Guntur, India

CERTIFICATIONS & HONORS

- Complete Data Wrangling and Data Visualization with Python - Udemy 2024
- Introduction to Artificial Intelligence (AI) - Coursera / IBM 2020
- International Excellence Award - Northern Arizona University
- National Silver Medalist - Taekwondo, National-level Competition, Chennai

SKILLS

Programming: Python, JavaScript, TypeScript, SQL, C **Backend & Web:** Node.js, Express, FastAPI, REST APIs, WebSockets, React **Databases:** PostgreSQL, Supabase, MySQL, SQL Server, Pinecone **Cloud & DevOps:** AWS (EC2, S3, Lambda), GCP (BigQuery, Cloud Run), Docker, Git, Linux **AI / ML:** LangChain, OpenAI API, RAG, NLP, Scikit-learn **Practices:** Agile/Scrum, SDLC, Code Review, Test Planning
