PROFESSIONAL SUMMARY

QA-focused engineer who finds the defects that matter. Led testing for a monetization sprint at an early-stage startup - **33 tests across 3 sessions**, uncovering a **P0 exploit** that allowed unlimited free in-app items - and surfaced **16 bugs** in a full backend code review, including a middleware-ordering defect that would have broken every Stripe webhook signature check in production. Backed by a CS degree and production backend experience, so the bug reports come with root causes.

CORE COMPETENCIES

- Test Planning
- Acceptance Testing / UAT
- Code Review
- Security Testing
- API Testing
- Regression Testing
- Python / Node.js
- Agile / Scrum

WORK EXPERIENCE

Oshi Mar 2026 - May 2026

Backend Developer & QA Intern · Remote

- Led QA for an in-app purchases / virtual-currency monetization sprint - executed **33 tests across 3 sessions**, uncovered a **P0 exploit** allowing unlimited free in-app items, and signed off all **9 acceptance criteria** after fixes.
- Performed a full backend code review surfacing **16 bugs**, including a critical Express middleware-ordering defect that would have broken **every Stripe webhook signature verification** in production.
- Shipped a real-time **WebSocket**-based text-to-speech streaming backend (**Node.js/TypeScript**) to Render with CORS whitelisting, rate limiting, and structured logging; load-tested across **20 concurrent sessions with zero connection leaks**.

EchoformAI Oct 2025 - Jan 2026

Co-Founder & ML Engineer · Remote

- Architected and deployed **LLM-powered inference pipelines** (Python, LangChain, AWS EC2/S3/Lambda) serving **50+ beta users** in the RF engineering community.
- Led product development from ideation to **MVP in 8 weeks**, managing a cross-functional team of 3 engineers and coordinating sprint planning and the technical roadmap.

Sentient Notes Jan 2025 - Jul 2025

Associate Founder & Backend Developer · Remote

- Designed and implemented the backend API in **Python (FastAPI)**, handling **500+ daily journal entries** at **sub-200ms** response times.
- Managed the full **SDLC** from requirements gathering through deployment, following Agile with **2-week sprints**.

PROJECTS

Team Task Tracker - Full-Stack Web App Full-Stack

Built a Kanban-style task management app with a **REST API**, user authentication, and drag-and-drop status tracking. Deployed to Render with environment-based configuration and input validation.

React, Node.js / Express, PostgreSQL, Render

Agile Delivery - Campus Event Registration System Project Management

Acted as **project manager** for a team build: authored the project charter, **work breakdown structure (WBS)**, and risk register, and defined scope with stakeholders. Ran sprint planning, standups, and a retrospective; tracked progress with a **Gantt chart and burndown**, keeping the team on schedule.

Jira / Trello, Scrum, Gantt, Notion

Generative AI Business Intelligence Assistant GenAI / RAG

Designed a **RAG** system with LangChain and the OpenAI API letting non-technical users query SQL databases in natural language, cutting report turnaround from **3 days to under 5 minutes**. Automated KPI summarization, modeled to remove **~15 hours** of manual reporting per week. Deployed in Docker on GCP for **20+ concurrent users**.

Python, LangChain, OpenAI API, SQL, Docker, GCP

EDUCATION

M.S., Management Information Systems - Northern Arizona University Jan 2023 - May 2026 · GPA 3.7/4.0

Flagstaff, AZ · Coursework: Project Management, Business Analytics, Database Management, Data Visualization, Systems Analysis & Design (SDLC), Statistical Analysis

B.Tech, Computer Science - Narasaraopet Engineering College Jun 2018 - Jun 2022 · GPA 8.63/10

Guntur, India

CERTIFICATIONS & HONORS

Complete Data Wrangling and Data Visualization with Python - Udemy 2024

Introduction to Artificial Intelligence (AI) - Coursera / IBM 2020

International Excellence Award - Northern Arizona University

National Silver Medalist - Taekwondo, National-level Competition, Chennai

SKILLS

Quality: Test Planning, Test Case Design, Acceptance Testing, UAT Sign-off, Regression Testing, Code Review, Defect Triage

Technical: Python, JavaScript, TypeScript, SQL, Node.js, Express, FastAPI, REST APIs, WebSockets **Tools:** Jira, Postman, Git, Docker, Linux, Jupyter

Databases & Cloud: PostgreSQL, Supabase, MySQL, AWS, GCP **Practices:** Agile/Scrum, SDLC, Sprint Planning, Risk Management
